PRACTICAL 09

AIM:- Create CloudWatch metrics for an EC2 instance.

Steps:

1. **Log in to the AWS Management Console and search for CloudWatch to open the service dashboard.**

TYCS 'A'
9020

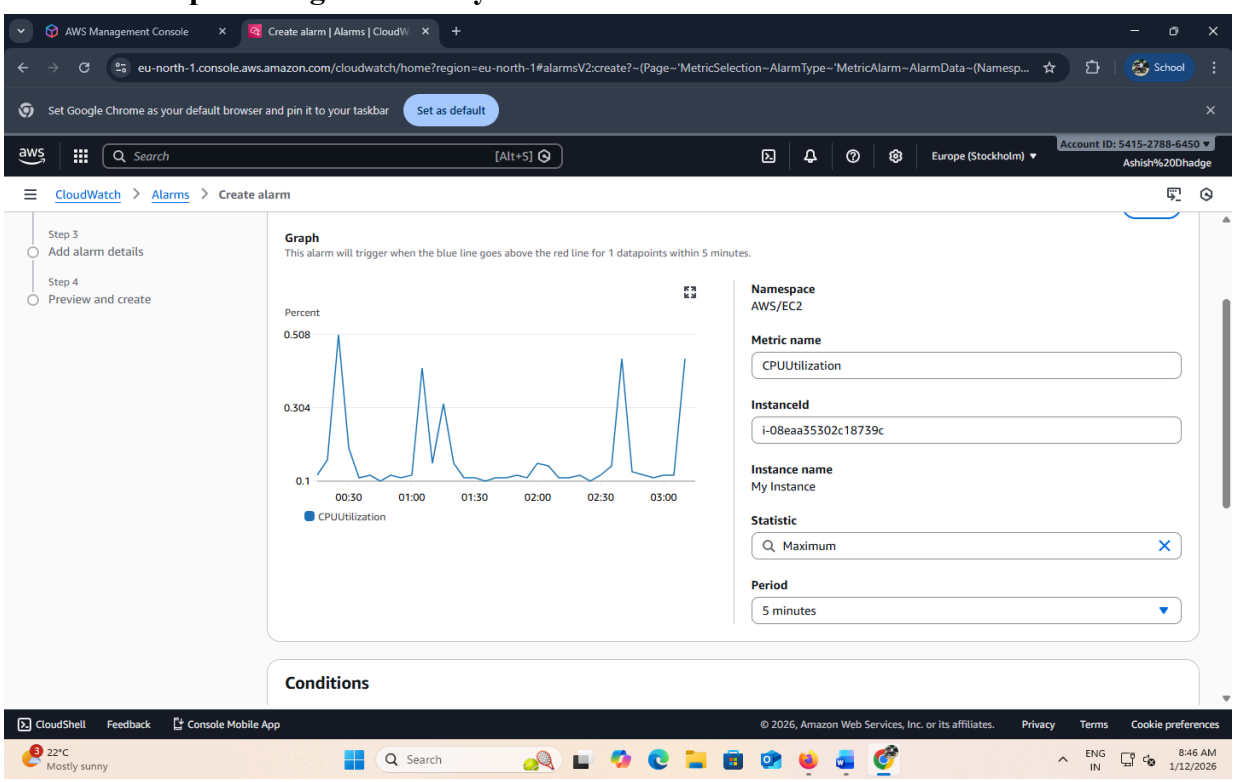
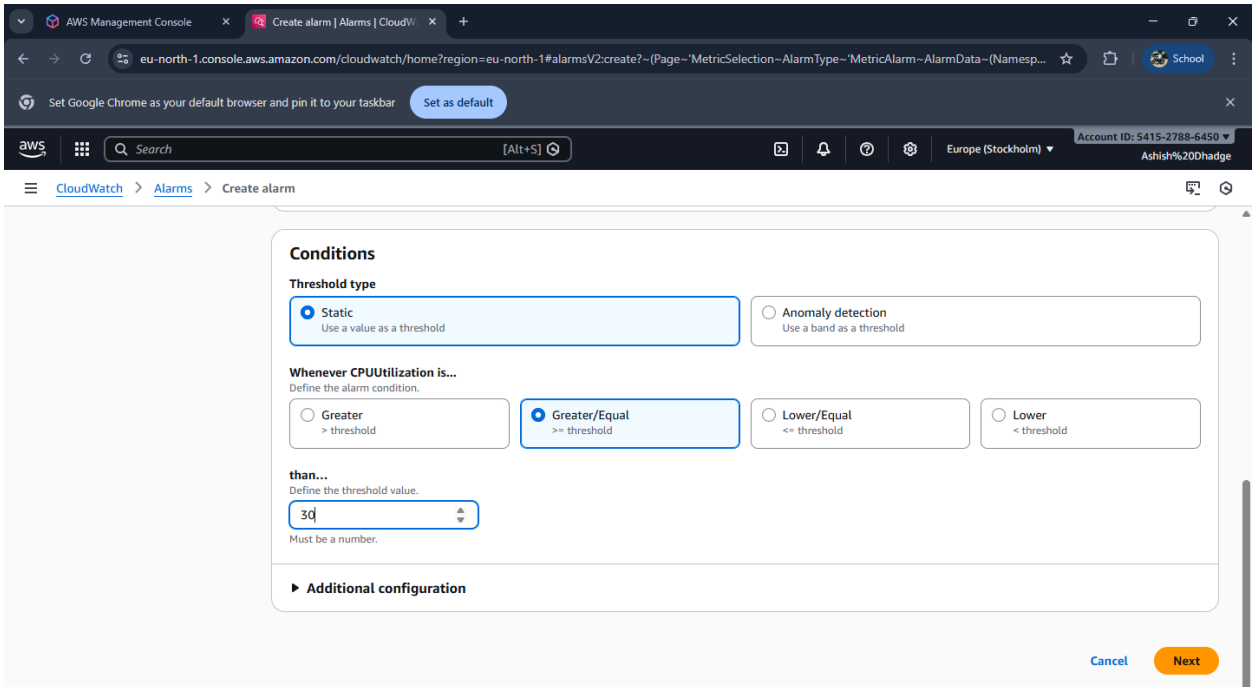
4. **Set the metric statistic to Maximum and the period to 5 minutes to ensure the alarm tracks peak usage accurately.**



Megha Chavan
TYCS 'A'
9020

5. **Under the conditions section, choose a Static threshold type and configure it to trigger when the value is Greater than 30.**



6. **Configure the alarm state trigger to "In alarm" and create a new SNS topic with your email address to receive notifications.**

AWS N... 6 days ago
to me

You are receiving this email because your Amazon CloudWatch Alarm "CPU-Utilization" in the EU (Stockholm) region has entered the ALARM state, because "Threshold Crossed: 1 out of the last 1 datapoints [49.5554109737584 (12/01/26 03:27:00)] was greater than or equal to the threshold (30.0) (minimum 1 datapoint for OK -> ALARM transition)." at "Monday 12 January, 2026 03:32:31 UTC".

View this alarm in the AWS Management Console:
https://eu-north-1.console.aws.amazon.com/cloudwatch/deeplink.js?region=eu-north-1#alarmsV2:alarm/CPU-Utilization

Alarm Details:
- Name: CPU-Utilization
- Description:
- State Change: OK -> ALARM
- Reason for State Change: Threshold Crossed: 1 out of the last 1 datapoints [49.5554109737584 (12/01/26 03:27:00)] was greater than or equal to the threshold (30.0) (minimum 1 datapoint for OK -> ALARM transition).
- Timestamp: Monday 12 January, 2026 03:32:31 UTC
- AWS Account: 541527886450

8. **To verify the setup, connect to your instance via terminal and install the stress tool to force the CPU usage above your defined threshold.**

```
ubuntu@ip-172-31-40-126:~$ sudo apt update
Hit:1 http://eu-north-1.ec2.archive.ubuntu.com/ubuntu noble InRelease
Hit:2 http://eu-north-1.ec2.archive.ubuntu.com/ubuntu noble-updates InRelease
Hit:3 http://eu-north-1.ec2.archive.ubuntu.com/ubuntu noble-backports InRelease
